IPELENG SELINA SITHOLE

IT Graduate | Business Systems | Digital Operations | Technical & SaaS Support

+27 67 888 3896 • Ipelengsithole5@gmail.com • Pretoria/Centurion, South Africa • LinkedIn: linkedin.com/in/selinasithole

PROFESSIONAL PROFILE

Final-year Bachelor of Information Technology student with practical experience across business systems, digital operations, data reporting, software projects and workflow improvement. Comfortable working between technical teams and business users to understand requirements, document processes, test solutions, troubleshoot issues and improve digital workflows. Hands-on exposure to SQL, Power BI, Python, REST APIs, FastAPI, GitHub, Android development, ERP concepts and AI-enabled applications. Seeking remote opportunities in technical support, SaaS/customer success, implementation support, IT project coordination, business systems and digital operations.

CORE SKILLS

- Business & Operations: Process improvement, workflow documentation, requirements gathering, user support, task coordination, reporting
- Systems: ERP concepts, CRM/business applications, SaaS platforms, system testing, implementation support, troubleshooting
- Data: SQL, Power BI, Excel, dashboard development, data organisation, business reporting
- Technical: Python, REST APIs, FastAPI, Git/GitHub, Android Studio, Kotlin, Jetpack Compose, basic backend development
- AI & Automation: AI-assisted workflows, backend AI concepts, workflow automation, AI application development
- Project Support: Documentation, issue tracking, Agile-style collaboration, Jira/Trello-style task management, stakeholder communication
- Tools: Microsoft Office, Google Workspace, GitHub, VS Code, Android Studio, Power BI, Odoo

EDUCATION

Bachelor of Information Technology – Web Design & Development | *[Stadio Higher Education]* | *[Expected Graduation: 2026]*

- Final-year student with practical coursework and projects spanning software development, databases, information systems, mobile development and business technology.
- Relevant areas: information systems, databases, software development, APIs, mobile application development, business/data reporting and systems analysis.

SELECTED PROJECT EXPERIENCE

KeyNest – Property Management / Business Systems Platform | *Portfolio Project* | *2026*

- Designed a property-management concept focused on helping SME property owners manage guests, access, cleaning and maintenance workflows from a central digital system.
- Mapped operational processes into software features, including role-based access, check-in/out workflows, notifications and task tracking.
- Explored backend/database architecture and the use of automation and AI to reduce manual administrative work.
- Developing the project with a focus on real-world business requirements rather than a purely academic demonstration.

API & Backend AI Development | *Portfolio / Technical Project* | *2026*

- Built and tested a Python-based API using FastAPI, including local server execution and interactive API documentation.
- Worked with REST API concepts, endpoints, request/response structures, virtual environments and GitHub-based development.
- Developing practical understanding of how backend services can support AI-enabled business applications and automation.

Finance Dashboard | *Android / Jetpack Compose Project* | *2026*

- Developed a mobile finance dashboard using Kotlin and Jetpack Compose based on a visual reference and specified UI requirements.

- Implemented structured layouts, Material 3 components, reusable UI elements and interactive screen behaviour.
- Used Android Studio for development, testing and debugging.

ERP & Business Process Simulation | *Odoo Project* | *Academic / Portfolio Project*

- Simulated business processes using an ERP environment, developing practical understanding of how business functions are represented in integrated systems.
- Worked with operational information and system workflows to understand how technology can support business processes.

Business & Data Reporting Projects | *Academic / Portfolio Projects* | *2025–2026*

- Created dashboards and reports using Power BI and Excel to present business information and support decision-making.
- Worked with SQL and structured datasets to retrieve, organise and interpret information.
- Translated operational requirements into clearer reports, dashboards and process improvements.

ADDITIONAL EXPERIENCE

Operations / Digital Project Work | *Freelance / Project-Based* | *2025–2026*

- Worked on digital projects involving websites, business workflows, task management and process improvement.
- Collaborated on requirements, content, testing and delivery while using tools such as GitHub, Trello and Jira-style workflows.
- Approached projects from both the user/business perspective and the technical implementation perspective.

CERTIFICATIONS & DEVELOPMENT

- Backend AI Engineering / AI Application Development – Flyrank (Learner Internship / Training)
- Additional self-directed learning in Python, APIs, AI applications, business systems, automation and Microsoft/ERP technologies.

TECHNICAL TOOLKIT

Languages & Development: Python, Kotlin, SQL, HTML, CSS, JavaScript (working knowledge)

Platforms & Tools: GitHub, VS Code, Android Studio, Power BI, Excel, Odoo, Trello, Jira-style project tools

APIs & Backend: REST APIs, FastAPI, API documentation, JSON, local development environments

Business Technology: ERP/CRM concepts, workflow automation, requirements analysis, process mapping, system support

REMOTE WORK STRENGTHS

- Comfortable learning new software and technical tools independently.
- Able to communicate technical information in practical, business-friendly language.
- Strong interest in improving inefficient processes through systems, automation and data.
- Experienced with remote-friendly collaboration tools, digital documentation and Git-based workflows.
- Able to work across technical and non-technical teams.
